

Inter Nano Poland 2016

14TH -15TH OF JANUARY - KATOWICE – BUSINESS & SCIENCE

www.internanopoland.com

InterNanoPoland is:

Internationalization of polish nanotechnological sector

Presenting the potential of SMEs and scientific institutes from Poland, Europe and all over the world.

Connecting Business and Science

Creating the bridge between business and science via discussions and networking. Defining new research and development trends.

Promotion of innovative achievements

Presentation of achievements from Polish scientists and entrepreneurs, start-ups, spin-offs and nano industries. Projection of ongoing innovative R&D projects in nano sector in Poland.

Experience exchange

Exchange of business and scientific offers and achievements. Discussion on nanotechnology issues. World's best practices.

B2S meetings and networking

Unlimited possibilities of conversations, meetings and opportunities to acquire new business contacts.

Development of innovative market

Stimulation of nanotechnological sector. Biggest Nano conference in Poland.

Unique in Poland - conference connecting both science and business

International Congress Centre in Katowice - the place of the InterNanoPoland Conference.

2016 edition:

Over 170 participants

Entrepreneurs, scientists, students, technological companies, business support organizations, governmental institutions, cluster.

Representatives from 8 countries

Poland, Brasil, Kazakhstan, Austria, Germany, United Kingdom, Czech Republic, Netherlands.

25 oral presentations

Presentations of latest developments, achievements and experience by recognized authorities in science, innovative industry and business.

60 poster presentations

Young scientists and their ongoing projects and achievements.

10 exhibitors

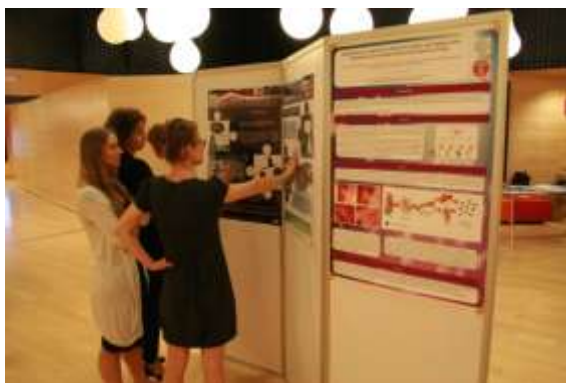

Best Polish nanotechnological companies, their technological presentation, B2B and B2S offer.

Study visits

Organized visits in Silesian hi-tech laboratories and successful, innovative nano companies.

Accompanying events

Information Day in the area of Nanotechnology, Advanced Materials and Biotechnology within H2020 framework, Networking sessions by Enterprise Europe Network.
